

OKANAGAN WATER SUPPLY & DEMAND STUDY: LEAD HYDROLOGIST AND WATER DEMAND ADVISOR

Polar Geoscience provided consulting services to the Okanagan Basin Water Board during the course of the \$2M Okanagan Basin Water Supply and Demand Study. Polar Geoscience provided the technical lead in the Hydrology and Hydrologic Modeling Project, managed by Summit Environmental Consultants, which established natural streamflow estimates at 81 locations in the Okanagan Valley and provided the basis for calibration of the MIKE SHE hydrologic model by DHI Inc. Polar also served as expert advisor to the Water Management and Use Study and was responsible for verifying and refining selected data sets including water demand patterns in the Okanagan Valley.
